

SOLUTIONS OVERVIEW

Weidenhammer

Part of Weidenhammer's commitment to each and every customer surrounds our ability to discover and deliver the right solution, based on each individual need.

Weidenhammer helps businesses determine optimal strategies for leveraging Cloud technologies, and we assist with the transition and ongoing support of these solutions. We look to build a long-term partnership to help our clients continuously plan for the future of their business.

As a result, we engage every customer in a thorough consultative process. By gaining an extensive understanding of each customer's business, we are able to provide a custom-engineered solution that meets their business needs now and is scalable for the future. Our vast portfolio includes: co-location, managed co-location, managed hosting and managed services for physical servers, private clouds, public clouds and hybrid solutions. Because there is no one-size fits all solution, our engineers can help clients determine what will work best for their unique business.

“ We perform a thorough consultative process to ensure we understand both your short and long-term goals. This is a primary pillar in Weidenhammer's ability to engineer the ideal customized solution for every customer. ”

THE RIGHT SOLUTION FOR SUPERIOR RESULTS

Which Solution is Right for You?

HammerCloud – A Public Cloud Engineered Specifically for Business

The HammerCloud solution is engineered strictly for business critical applications that require secure and dedicated resources. All configurations are designed to meet each customer's individual workload needs, both now and as they continue to grow their business.

HammerCloud is a fully-customized, fully-managed public cloud solution that offers customers the flexibility they require, at a cost they can afford. This full-service management solution includes installation, configuration and patch management of your operating system and databases, proactive monitoring and backup and restoration services.

“ HammerCloud is a tailored, fully-managed cloud solution that offers superior flexibility and low cost of operation. This solution is built with the enterprise in mind. ”

Additional benefits of Weidenhammer's HammerCloud services include:

- Weidenhammer only permits business-critical applications in the Hammer Cloud
- HammerCloud provides out-of-the-box, hardware high availability
- Virtual machines possess the capability to scale vertically as your workloads increase
- Weidenhammer provides security services for your HammerCloud environment to help achieve security, compliance and regulatory initiatives
- Bandwidth is included and does not vary month-to-month
- The HammerCloud is able to handle intense applications and databases that require high IO performance

Private Cloud

Weidenhammer's private cloud offering is a personalized, cost-effective solution that permits rapid access to highly available and flexible compute resources. Weidenhammer's cloud specialists work to develop the perfect cloud solution based on the specific requirements of each business.

Hybrid Cloud

Weidenhammer's hybrid cloud combines services and data from a wealth of cloud models and creates a unified, automated, and well-managed environment. When the time comes to select the proper cloud solution, a one-size fits all approach will not suit the needs for your organization.

Managed Backup/Recovery

A reliable and unwavering disaster recovery and backup mechanism is no longer an item that you can afford to ignore. It's not a question of "if" you will be a victim of a data or systems disruption, it's a question of "when?" Fortunately, Weidenhammer is adept at safeguarding your critical business data using a suite of best-in-class solutions.

THE RIGHT SOLUTION FOR SUPERIOR RESULTS

Managed Co-location Services

Your time should be spent on what you know best – your business. Let the day-to-day administration of your hosting and application servers to the people who know this area best – Weidenhammer. Weidenhammer gives your organization the feel of a large and powerful IT department, without the costs. We provide scalable space, power, cooling, and physical security for servers, storage, and networking equipment that will produce the following benefits:

- IMPROVED AVAILABILITY AND EFFICIENCY
- BETTER OPERATIONAL PERFORMANCE
- SCALABILITY TO MEET YOUR NEEDS
- DETAILED REPORTING
- BETTER VISIBILITY AND ACCOUNTABILITY

“It’s not a question of “if” you will be a victim of a data systems disruption, it’s a question of “when?””

Weidenhammer customers are able to leverage three world-class tier-3, SSAE16 Type II accredited data centers that are equipped to deliver fully-redundant power, monitoring, security, availability, bandwidth and connectivity.

We have three locations: Reading, PA, Chandler, AZ and Philadelphia, PA.
